EDUCATION

Texas A&M University

B.S. Computer Science

GPA: 3.68/4.0

Relevant Coursework: Discrete Structures, Program Design and Concepts, Data Structures and Algorithms, Computer Organization, Programming Languages, Calculus II, Calculus III, Differential Equations

College Station, TX

Aug. 2024 – May 2028

Clear Lake High School

STEM Endorsement

Relevant Coursework: AP Computer Science Principles(5), AP Calculus AB(5)

Achievements: Honors Program (2023, 2024), Scholars Program (2022), Sumacumlaude Graduate

Scholarship: Clear Lake High School Tennis Scholarship

Houston, TX

Aug. 2020 – May 2024

TECHNICAL SKILLS

Programming Languages: Python, Javascript, HTML, CSS, C++, Java, Haskell

Frameworks and Libraries: React, Flask, Matplotlib, SymPy, NumPy

Tools: YOLO, OpenCV, TensorFlow, PyTorch, PyMuPDF, Git/Github, Office 365

EXPERIENCE

Pappasitos Cantina

Server

Houston, TX

May 2025 – Aug 2025

- Provided high-quality customer service in a fast-paced, high-volume restaurant environment, ensuring guest satisfaction through attentive and personalized service.
- Managed multiple tables efficiently, coordinated with kitchen and bar staff, and maintained detailed knowledge of menu offerings and specials.

ACTIVITIES & PROJECTS

Reflect AI

Machine Learning Self Project

Houston, TX

May. 2025 – Jun. 2025

- Trained a custom **YOLOv8** model and utilized object tracking and perspective transformations to automate line-call flagging in real time
- Engineered a modular pipeline using **OpenCV**, with reproducible training/eval scripts and a live UI overlay for continuous ball tracking
- Built a voice-triggered challenge workflow using **Porcupine** and **PyAudio** with a rolling replay buffer and slow-motion playback; overlaid call results for accurate reviews

TidalHack 2025

Insight

College Station, TX

Mar. 2025 – Apr. 2025

- Developed a full stack web application using **Flask** and **React.js** that generates personalized tech career roadmaps from user resumes, GitHub, LinkedIn, and user-defined preferences
- Integrated **Google Gemini API** to generate AI-powered recommendations for skills, certifications, and project ideas tailored to user interests and experience
- Designed an interactive UI with real-time previews and implemented PDF export using **PyMuPDF** for seamless roadmap sharing and offline access

HowdyHack 2024

Hit or Miss

College Station, TX

Sep. 2024 – Oct. 2024

- Integrated **Spotify API** to fetch real-time music data, enabling users to explore new music and artists based on listening history and preferences as well as top recently streamed hits.
- Showcased the app to a panel of judges, emphasizing creative solutions and the technical execution achieved under time constraints.
- Built dynamic **React** components to display personalized music data and improve user engagement and interaction.
